TRACKWRESTLING
RESULTS ENTRY POINTERS

The NWCA and Trackwrestling have partnered to provide an easy way to report match results. The rosters on Trackwrestling are tied to your weight management program (OPC) provided by the NWCA and will update as entries and changes are made.   Starting at the beginning of this wrestling season all varsity match results shall be entered into Trackwrestling.

 There are several ways your results can be entered into Trackwrestling:

 1.   After running a tournament on Trackwrestling, you will just need to sign off on the team and wrestler matchings when the tournament is completed. Completing this process will allow the results for each team to be dumped back into their respective schedule. This is done on a nightly basis so once the teams and wrestlers are signed off on, the results should show up on the teams schedules the next day.

2.   If you competed in a tournament that used Trackwrestling, your results will sync to Trackwrestling after the tournament directors complete the sign off process as described above. If the directors have not signed off and your results are not syncing you can import them manually by clicking on the event on your schedule and using the import option.

3.   All dual results will be entered into Trackwrestling through your schedule page. Results entered by one team will sync to the other team's schedule page so only one team needs to enter them.

4.   If you competed in a tournament that did not use Trackwrestling then you will need to enter the results manually into your Trackwrestling schedule page.
